

Red River Weed Control District 2021 PROPOSED PESTICIDE PROGRAM

Public Notice is hereby given that the Red River Weed Control District intends to conduct their pesticide program within the Municipalities of DeSalaberry and Ritchot and Village of St Pierre Jolys.

To control noxious weeds within the district, the products in the allowable list as per MB regulation 286/2014 plus the following will/may be used between May 1st and November 1st, 2021.

- 2-4-D Amine 600 Fiesta
- Glyphosate Dicamba
- 2-4-D Ester LV 700 Adios
- Amitrol Finalsan
- Aminopyralid Aminocyclopyrachlor
- Surfactants are N-phuric, Li700, Hasten NT, Aquasoft

To control pests including grasshoppers, elm bark beetle, forest tent caterpillars, cankerworms, mosquitoes and other pests within the district, the following insecticides will/may be used between May 1st and November 1st, 2021.

- Ripcord Decis Pyrate
- Aquabec 200g Dimethosphate Vectobec
- Malathion Foray

Anyone likely to be affected by the proposed programs and the issuance of a pesticide use permit may send written submissions or objections within 15 days of the publication of the notice to the department below:

**Manitoba Sustainable Development
Environment Approvals Branch
1007 Century Street
Winnipeg, Mb. R3H 0W4**

Notice is hereby also given that the Insect Control Branch of the City of Winnipeg intends to conduct an insect control program within the boundaries of the municipality extending within and up to 24 kms of the city boundary to control mosquitoes in stagnant water on both private and public property. An individual opposed to the said program on or adjacent to their property may register, in writing to both:

**Insect Control Branch
3 Grey Street
Winnipeg, Mb. R2J 1V2
AND
Red River Weed Control District
Box 494
St Pierre Jolys, Mb. R0A 1V0**

Please include the specific reason(s) why one is opposed to this spray program.
